Concerned about mudslide prevention? Building code issues? Infrastructure upgrades? Where to even begin? The survivors of a devastating 1993 Los Angeles fire have made their way down that long road to recovery - together. Now they want to share what they learned about organizing their communities so others won't have to reinvent the wheel.

ALL residents of communities affected by the wildfires are urged to attend this **FREE** workshop, whether their homes burned or not. Important resource information will be provided to all participants. For more information, visit www.firerecovery2003.org or call Eric Medina at Community Partners, 213/439-9640 x27.
